Assignment 4 - My Very Own Speech Project

Purpose:

COVID-19 has been a worst pandemic in the history. A coherent understand in the society must be important. Right precautions to overcoming must be taken. Communicating necessary steps to minimize the spread will make the virus under control.

Topic:

Let's get together to destroy COVID-19.

Opening:

Asking a curious question in the beginning will grasp the audience attention. Such as "Raise up your hand if you have never heard of COVID-19". Playing a rare video about the first discovery of the virus (The video in which the doctor first to share information about pandemic and was crying).

Structure:

Introduction:

Firstly, A self-introduction must be made prior to the topic to be addressed. The why you care about such criteria must be stated. The qualifications and previous educational achievements relevant to the discipline can be included. Why the attention for the speech must be stated.

Body:

What is COVID-19 to be addressed. Therein the initiation and the birth location of the virus are stated. Relevant historical details such as transmission to humans, first human death are to be covered. Then the nature of behavior and the chemical explanation are to be discussed. The statistical data locally and internationally both are to be highlighted. The mortality rates and survival rates can be stated. Next, the virus contagiousness preventive methods such as the importance of wearing a mask, washing hands with sanitizer, keep the minimum distance with others and such things must be stated. The COVID-19 vaccination is to be talked about. The methodology and the instructions for getting vaccinated such as to how many injections and waiting period can be pointed out. The importance of self-quarantine to mitigate infection rate is stated.

Conclusion:

How the virus can be under controlled by following right instructions need to be highlighted. Historical pandemics such as Swin Flue, Spanish Flue, HIV, Ebola were able to under control by taking right preventive precautions to be said. The hesitation about pandemic has to be cleared in the end.

Main Points:

1. What is corona virus?

First transmission by a bat. It is similar to recent pandemics but has a higher mortality rate.

2. How is it spread?

Through respiratory droplets, skin contact, Surface contamination so better be at home!

3. How to prevent it from spread?

Wearing mask, washing hands with sanitizers, isolation (quarantine) so make sure you have your weapons.

4. Medical process for immunity

Vaccination needs to be done three times. 6 months period must be between each vaccination. The vaccine trains the immune system to deactivate the virus cells at present.

Conclusion:

The ending can be giving a preventive support impression. The audience must get to know more about the nature of the virus and the possibility of overcoming. Showing that the pandemic can be mitigate completely should be the last impression to end with.
